

chike
the cargobike

CHIKE is extraordinary. A space marvel. And stacks of fun to ride! Manoeuvrable, light and comfortable. The new compact class among cargo bikes.

CHIKE is a modern compact cargo bike that is as sporty and intuitive as a normal bike thanks to its tilting technology, despite being a three-wheeler. It is the perfect combination of being practical and fun to ride.

Coming in at just under 2 m in length and 73 cm wide, CHIKE also fits on narrow cycle paths and through all standard doors, but still offers a lot of space for everything you want to transport due to its innovative design. The sprung tilting suspension makes the CHIKE extremely secure, comfortable and manoeuvrable.

Be it for a young family, commercial enterprise, or anyone wanting to do more without using their car: the CHIKE's modular design makes light work of retrofitting equipment. Whether transforming from e-kids to e-cargo or vice versa, CHIKE adapts to your current life situation.

CHIKE e-kids

For the daily trip to kindergarten, shopping with the kids or a weekend trip out into the great outdoors, the CHIKE e-kids is the ideal companion for young families. Despite its small overall width of only 73 cm, CHIKE with its 70 cm seat also offers two older children enough space to be comfortably seated for a longer ride.

The large windows on the front and sides ensure children have a great panoramic view making every ride an experience not to be forgotten. Mum and dad can always keep an eye on their children thanks to the small window in the roof.

The five-point harnesses provide maximum safety and can be used flexibly for one child seated in the middle or two children side by side.

If heavy excavation work in the sandpit is on the cards, toys can be easily transported in the Eurobox, available as an optional extra.

Data

Drive system: SHIMANO Steps **Battery capacity:** 418 Wh **Wheel size:** 16" / 20" **Gear set:** SHIMANO "Nexus Di2" 5-speed, freewheel **Brake system:** hydraulic disc brake **Lighting:** B&M IQ-XS, 70 Lux **Weight:** 38.0 kg **Maximum permissible weight:** 200 kg **Colours:** dusty blue, melon yellow, black matt **Suitable for rider height:** 160–200 cm **Special feature:** Choice of colours for pad set

CHIKE e-kids

Pad set incl. safety harness system

The pad set is available in fire red, melon yellow and grey. When buying a new CHIKE e-kids, it is included in the scope of delivery and you are free to choose the colour.

You can also obtain the pad set as a separate CHIKE accessory.

Item No.

Grey 0.230.902/9

Melon yellow 0.230.903/7

Fire red 0.230.904/5

MaxiCosi adapter

This adapter offers you the possibility of securing a MaxiCosi baby car seat securely in the cab. As the MaxiCosi is not limited to being fitted in the middle but on the one side, a second child can easily ride alongside in the CHIKE e-kids.

The adapter is compatible with the MaxiCosi models "CabrioFix", "Pebble" and "Rock".

Item No. 0.230.901/1

Eurobox with lid

Ideal for additional storage, especially when parents are accompanied by their children while shopping. A quick-release clip system on the frame means these boxes (40 x 30 x 27 cm) can be easily attached and removed from the CHIKE.

The design of these lockable boxes means they are only suitable for the CHIKE e-kids. Load per box 12 kg.

CHIKE e-cargo

Blocked streets and problems searching for a parking space are a thing of the past; the cargo bike trend is unstoppable. The CHIKE e-cargo offers many benefits for all areas.

Despite its compact design, CHIKE has a considerable loading volume. Its transport platform measuring 90 cm in length and 73 cm in width has plenty of space for everything you would want to transport. Airline rails recessed into the platform let you attach cargo lashing straps with ease to ensure the load is held in place.

The casing, available as an optional extra, turns the transport platform into a transport box measuring 35 cm in height and with a loading volume of approx. 210 litres. It is attached and also removed in just a matter of seconds. This means that every e-cargo can be optimised for its respective use in no time at all before each trip.

The transport platform can be turned into a transport box with the casing, available as an optional extra. A matching tarpaulin is available as an accessory to protect your shopping from both rain and prying eyes alike.

CHIKE e-cargo

Casing

(without edge pads)

The casing transforms the transport platform into a spacious transport box. The four side parts can be attached and removed in a matter of seconds.

They can be stored without taking up much space when not in use.

Item No. 0.230.911/0

We recommend purchasing the edge pad set, an accessory, as shown in the picture.

Tarpaulin

The tarpaulin reliably protects your cargo from rain and prying eyes. The integrated fibreglass rod prevents water collecting on top of the tarpaulin.

Item No. 0.230.912/8

Lashing strap

Lashing straps with fittings on both ends to attach to the airline rails recessed in the platform. These allow you to secure any load quickly and easily.

Item No. 0.230.913/6

Systainer adapters (4 pc set)

The Systainer adapter can be inserted into holes provided in the platform and provide the possibility to attach Systainers and Maxi-Systainers (e.g. from TANOS, FESTOOL, MAKITA, etc.) easily to the platform.

Item No. 0.230.914/4

Eurobox without lid

Ideal for extra storage space. The transport boxes (40 x 30 x 27 cm) without lid can be attached to both the e-kids as well as the e-cargo. Load per box 12 kg.

CHIKE e-kids
TEST WINNER AND
PRICE/PERFORMANCE WIN-
NER

BIKE BILD had seven families test seven different e-cargo bikes for a period of seven months. Afterwards, the families were able to award stars – for the winner, there were seven stars, six for second place and so on. Then the stars were added up.

"We are very impressed by the overall concept of the Chike. It provides good protection for children as a very compact bike. Its tilting technology makes the bike easy to ride and a clever feature allows the wheels to be locked to make loading the bike easy work."

CHIKE e-kids
VERY GOOD
Test: Six "special bikes"

"Even with a load of 60 kilos, the bike remained incredibly stable. Tipping over? False alarm! Its parking function ensures it is stable when standing. The e-kids is a super nimble cargo bike with small dimensions. It puts the fun into transporting children! Farewell second car!"

CHIKE e-cargo
RECOMMENDATION
Test: Endurance test

"With e-cargo, Chike offers a flexible, well thought-out and stable cargo bike for everyday use. And even if the price may seem high to some, it is in the end absolutely justified in terms of practical design, number of units, equipment and riding performance."
